

April 20, 2011

Dear Valued Customer:

Persistent shortages and the rising price of propylene continues to drive up the cost of most of our raw materials and many of these are reaching new record high levels. In order to continue to produce and supply our polymer products to you we must again increase our prices.

SNF is implementing a price increase effective our shipping date of May 9th 2011 as per the attached schedule.

We thank you for your continued support during this difficult time and pledge to monitor and reduce our prices when the raw material situation allows.

Please contact your SNF sales representative if you have any questions.

Yours sincerely,

Peter Nichols
President
